

Problems With Palm Springs Tram

February 21, 1977
Palms Springs Tram
1977-006

Due to strong winds, some cables on the tramway had become tangled. The tram cars were able only to inch along slowly. RMRU was contacted and asked to be ready in case the cars stopped completely and the people inside would have to be rescued. About three hours later, the good news was received that the cars were in their respective stations and that everyone was ok.

RMRU is a volunteer search and rescue team that covers Riverside County and assists other teams with search and rescue efforts in other counties. Each member purchases their own equipment and takes time off work, without compensation, to participate in search and rescue missions. Team equipment is purchased from contributions from the community. We are a non-profit organization and are funded by [donations](#) from people like you.
